Part of Records Package / Supplement / Correction

- C.htm

How can the secretary of energy be preparing to recommend Yucca Mountain for a high-level nuclear waste dump when thousands of public comments on the Draft Environmental Impact Statement have not been addressed? Without Final Environmental Impact Statement, a detailed transportation scenario, or a licensing rule, the Department of Energy lacks the basis for consideration of site suitability. The public cannot have confidence in any recommendation that arises from such a dramatically flawed process. I urge you to abandon the Yucca Mountain Project. Sincerely, Wilfred R. Kizer, 3911 Park Blvd, Apt. 1311, San Diego, CA 92103.
